**Subject:** centrifuges that will not be done this time  
**Importance:** High

Hi,  
I received the last of the inventory list for centrifuges late Friday afternoon and just had time to review the lists this morning.

Based on the inventory and contract that was submitted in July, 2008, we **can not do PM** on the newer units, unless the individual labs can pay for the PM. This is how I've been instructed to handle these types of situations in the past.

The centrifuges listed below need to be covered by the lab:

Room 306	Allegra X-22	S/N	AKB08E012
Room 712	Model 5801R	S/N	5811XJ940778
Room 709	GR4i	S/N	306110045
Room 866	5417-C	S/N	5417-B02608

Caley and Whitmore will not do the PM on these units until PO are received.

Thanks,  
Peggy DiNatale
